### # Effects and the Problems

Effects your students have gained	Points for further improvement
Japan and Russia have time difference in 6 hours and it was a problem. we can't communicate on the forum at real time. Also not every group could communicate effectively. But we tried to make a chat room for pairs to make communication more closer. some groups could reach such effect.	Effective use of the forum

### # How has your impression toward your partner's country/region and the world changed?

Changes in the students	Changes in the teachers
This year with the help of this project my students became more tolerant to foreigners, very passionate about other cultures. They want to continue the research of Japan culture and learn Japanese language. They said me they will find the way to make a trip to Japan to meet their friends and to see a beautiful country with their own eyes.	It has not changed, because I am very closely connected with Japan and have been studying the culture and language of this country for many years. But I feel there is still much to learn.
